DETAILED ACTION

Applicant's election of Group I, claims 1-22 and 56-61 in the reply filed on 10/30/09 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Although an election was made as defined above, after further review (1) claims 8 and 9 define two distinct species and (2) claims 14 and 16 define two distinct species; therefore a species election is required for the *elected invention of group I, claims 1-22 and 56-61.*

Election/Restrictions

1. While this action is following a previously filed Office Action, the claims currently present distinct species not previously considered on the merits which renders the following proper restriction requirement.
2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A wherein the discrimination unit includes a heater and a thermistor, which appears to correspond to claim 8.

Species B wherein the discrimination unit includes instead of a heater and a thermistor, a heat contact pin and a thermistor contact pin, which appears to correspond to claim 9.

Species 1 wherein the discrimination unit with a positive electrode and a negative electrode, which appears to correspond to claim 14.

Species 2, wherein instead of a positive electrode and negative electrode, two electrode contact pins for applying a voltage to a positive and negative electrode which are provided on the plate, which appears to correspond to claim 16.

Applicant is required, in reply to this action, to elect a single species of A or B and a single species of 1 or 2, to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or

corresponding special technical features for the following reasons: the identified species recite mutually exclusive features.

It is to be noted that the previous restriction is upheld and applicants election of Claims 1-22 and 56-61 has been entered.
